### 6. MULTIPLE BLINDS – SINGLE CASSETTE

Multiple Blinds in a single Cassette are **not** possible.

### 7. WARRANTY

Materials and Workmanship are covered for 3 years for normal use of blinds. Warranty does not include damage from abuse, inappropriate cleaning agents and methods, careless handling, freight, installers mishandling or blinds made outside of recommended sizing. Product failure after 3 years will be assessed and should a legitimate claim be approved a pro-rata basis of correction will be applied.

### 8. SUITABLE LOCATIONS

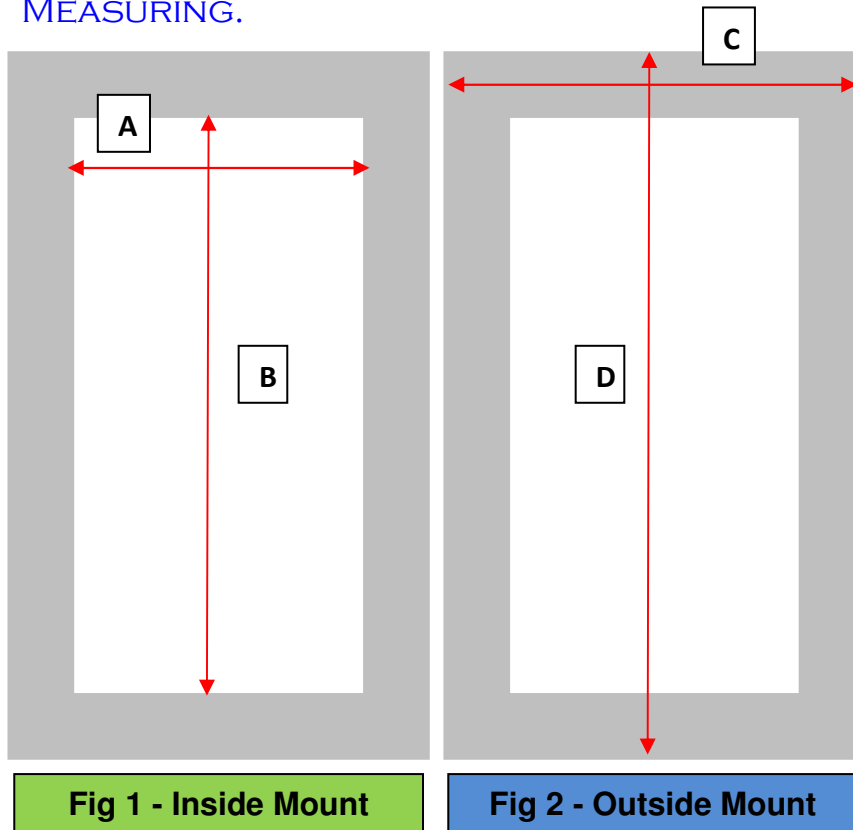

Elegance Blinds look great in almost any situation. However there are some environments that should be avoided –

- A. Very breezy or windy locations. [Fabric edges will be damaged].
- B. In reach of pets or young children.
- C. Where blinds are continually moist. [Mildew will eventually form]
- D. In locations where chemicals are strong – eg: chlorine from indoor pool or spa.
- E. Outdoors.
- F. Windows with controls that are reached for behind blind

## 9. LINING UP STRIPES – [SIDE BY SIDE BLINDS]

Blinds situated Side-by-Side will have stripes line up ONLY if they are identical Drop and installed with Cassette at EXACTLY the same level Otherwise line up is not possible.

## 10. MEASURING.

### A. INSIDE MOUNT [REVEAL INSTALLATION] – SEE FIG 1.

Measuring for Inside mount is critical to ensure a great result.

#### I. Measure inside Reveal at “A” [width] and “B” [drop].

It is important that “A” is measured where the Cassette will be installed as it is the widest part of the blind. [The Cassette is approximately 30mm wider than the fabric – roughly 15mm each side]. Clearance deduction for the width is 5mm.

#### II. Unlike other Roller Blinds, the drop measurement is critical to the correct function of the blind. *The manufacturing process governs that the blind is in the full stripe overlap position at the specified drop.* There is some personal preference latitude here as to whether –

No deduction is made [Bottom Rail will sit on reveal]

5mm Deduction

0mm deduction

## SUMMARY FOR INSIDE MOUNT DEDUCTIONS: WIDTH - 5MM. DROP – 5MM.

### Outside Mount [Face Installation]

Measuring for Outside mount is not so critical UNLESS there are obstructions to take into account.

- I. Measure at “C” from Outside of Architrave to Outside of Architrave. NO DEDUCTIONS NECESSARY. [Additional width can be applied to ensure fabric covers architrave. For Fabric to cover the architrave the width ordered needs to be approx 30 – 35mm wider than measurement “C”.
- II. Measurement “D” is from top of architrave to bottom of architrave. No deductions necessary.

## SUMMARY FOR OUTSIDE MOUNT DEDUCTIONS: NONE NECESSARY.

## 11. INSTALLATION

Installation Brackets are Universal [Both Inside and Outside Mount].

Brackets may be installed at any point along the Cassette – preferably at a secure fixing point. [For low strength fitting situations, additional brackets to the recommended are advised].

At least one bracket should be located as near as possible to the control end of the blind to support the chain operation of the blind.

It is vital that the brackets are fitted perfectly horizontally otherwise the blind will roll up crooked and fray the fabric edges. Incorrect installation voids warranty on frayed fabric.

## 12. CLEANING

### A. Cassette and Bottom Rails.

Aluminium Surfaces can be cleaned with a clean soft cloth and normal household mild cleaning agent. **Caution:** Do not allow cleaning agents to come in contact with Fabric.

### B. Fabric.

#### **DO NOT USE CHEMICAL CLEANERS ON ELEGANCE FABRIC.**

#### I. General Cleaning

Your Elegance blind may gather dust and from time to time need cleaning. Use a hair dryer on cold to gently remove dust, or use an anti-static soft brush or cloth to gently attract dust from the fabric.

#### II. Spot Cleaning

The Elegance fabric should be treated carefully and gently when spot cleaning. Use a damp cloth with a very mild detergent and gently “dab” the affected area. Harsh rubbing will remove the stiffening on the fabric and distort its surface. It is vital that the fabric not be creased during this process.

### 13. DYE LOT

Minor dye lot variations will arise from time to time. Basic precautions should be taken.

A. Within an order.

If blinds are immediately next to each other in the one location, it is advisable to state this when ordering.

B. Subsequent orders.

Should the same colour fabric be ordered at a later date, it is expected that there will be a dye lot variation.

C. Swatches.

When a customer selects a colour, they should be reminded that dye lot variation can happen, and the dye lot of the swatch will not be exactly the dye lot of the finished blinds.

### 14. DISCLAIMER

The recommendations in this Reference Manual are a guide only. Individual interpretation based on specific jobs, will be necessary.
